 - Conversion
 - Mining
 - Replication
- **Protection Strategies and Tactics**
 - Storage Program Development and Implementation
 - Data Backup Administration
 - Disaster Recovery Program Development and Services
- **Database Administration and Consulting Services**
 - Staffing of Data Management Positions

Data Management Staffing Services

SPI's outsourced Data Management Staffing Services provide clients with highly skilled personnel for on-site administration of data management projects as well as staffing of data centers. Our global recruiting team identifies, screens and deploys individuals as well as entire teams and has the experience with long term deployment and management of large scale teams in both commercial and U.S. military facilities.

SPI's premier experience includes multi-year outsourcing engagements with top corporate, U.S. Federal Government and U.S. military organizations. Industries served include banking/financial, insurance, healthcare and professional services with a client list that includes BNSF, JCPenney, Texas Instruments, U.S. Army (Fort Sam Houston Information Technology Center), U.S. General Services Administration and others.
