

SOFTWARE PROFESSIONALS, INC.

Behavior-Based Safety

From a young age, we are taught that safety is a learned behavior. Our **SafeConnect** application uses Observation and Intervention to highlight good practices and risks leading to a hazard free workplace when safety practice becomes a habit.

Safety is paramount

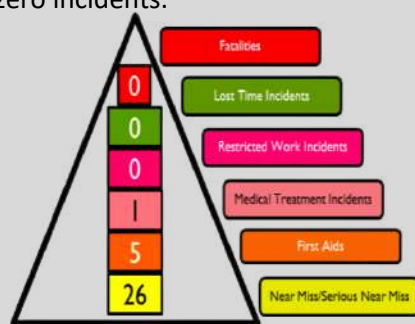

From office environment to construction to manufacturing, many industries are making strides to put safety as their #1 priority. In fact, the success of your organization depends on it.

SPI has your solution

Software Professionals, Inc. has taken the importance of safety and applied that to a business solution product that fits into your organization's safety culture. **SafeConnect** is a web based and mobile device application that is designed to improve safety performance and drive towards zero incidents.

"IT IS PARAMOUNT FOR ALL EMPLOYEES TO BE SAFETY CHAMPIONS AT THEIR ORGANIZATION IN AN EFFORT TO KEEP THEMSELVES AND EVERYONE AROUND THEM SAFE AND SOUND BEFORE GOING HOME."

- Reena Batra, CEO

VALUABLE BENEFITS:

SafeConnect features allow the user to make an impact to achieve safety culture excellence by engaging them with our **easy-to-use**, flexible safety management modules that will set up your organization for success.
